Hi

I've an access 2000 adp connected to an sql server 2005 database.  
In access, in the listview of the stoked prodedure i see "Ps\_TEST;1 (DBO)".  
The real name, that i can see in sql management, is "Ps\_Test (dbo)".  
Why we get ";1" ? This problem concerns all stocked procedure.

Any idea?

Thank you.

Pascal
