Yes, as I've said it works perfectly when in LAN.... I'm wondering if some other ports need to be accessed from the Internet or if some credentials are passed automatically while in the Domain.... The strange is that everything works (SQL Queries, etc)

"aaron.kempf@gmail.com" <aaron.kempf@xxxxxxxx> wrote in message [news:7ef0e47d-511a-4806-a44a-1b35d81e1740@xx](mailto:news:7ef0e47d-511a-4806-a44a-1b35d81e1740@xx) do you have permissions to the spoc?

I'm happily using a remote SQL server over the internet using Sylvain Lafontaine's suggestion:

"use a comma to specify the port number as in a.b.c.d,1433"

Unfortunately I have noticed that stored procedures have some problems, that is they don't execute at all when launched remotely... is there a particular reason, in your opinion, why this happens? While in LAN, they work perfectly....

The error is:

"Run-time error '2812' Could not find stored procedure 'SPInc'.

here's the offending code:

\*\*\*\*\*

```
spstring = "exec SPInc '" & _  
fGDataFine & _  
"', '" & _  
fGDataInizio & _  
"', '" & _  
Me.Anno & ', '" & _
```

Re: ADP: Can't use stored procedure on remote SQL server

Me.Mese & "," & \_  
AnnoPrec & "," & \_  
MesePrec & "," & \_  
spOrderBy

Me.RecordSource = spstring  
\*\*\*\*\*

I
