Hi Yaacov,

Thanks for your update and further information!

The error signature seems to be no help on troubleshooting the issue. However, you confirmed you didn't convert the VBA project (or the whole database) to AccXP, instead you only opened it as the Acc2000 format.

Based on your clarification, I assumed that you convert the Acc2000 database to Acc97 using AccXP, am I right? If that, I suspect that the VBA project was corrupt after you used AccXP to convert it to Acc97 version from Acc2000 file format.

I'm not sure if you have tried to import the form and its underlying data sources to a new created database, and what's result? If you haven't, we recommend you do this import operation to see if the form can be opened.

For more methods to troubleshoot the database corruption issue, please read the following articles:

279334 ACC97: How to Repair a Damaged Jet 3.5 Database

209137 ACC2000: How to Troubleshoot and Repair a Damaged Jet 4.0 Database
<http://support.microsoft.com/?id=209137>

Please apply my suggestions above and let me know if this helps resolve your problem. Thanks for your patience and cooperation!

Best regards,

Billy Yao
