Hi Al

Thanks for your replies. Good lateral thinking! The click now always goes to the far left of the field. Nice one!

I tried the Validation rule... it works. I also tried the code you sent but get the error "Compile Error: Block If without End If" . ..this opens up the debugger so there's something there VBA doesn't like.

I've just changed the onclick event to your new suggestion. Before it was:
[VRM].SelLength=7

Thanks Al

Rich
