if there is a possibility that a record will have Receiving data entered, but not Disassembly data entered, \*when you move to that record\*, then change the Current event to

```
If IsNull(Me!Receiving) Then
DoCmd.OpenForm "fPopUpReceiving"
ElseIf IsNull(Me!Disassembly) Then
DoCmd.OpenForm "DisassemblyFormName"
End If
```

again, if you don't want the pop-ups on new blank records, then change the above to

```
If Not Me.NewRecord Then
If IsNull(Me!Receiving) Then
DoCmd.OpenForm "fPopUpReceiving"
ElseIf IsNull(Me!Disassembly) Then
DoCmd.OpenForm "DisassemblyFormName"
End If
End If
```

aside from the above, add the following code to the Receiving control's AfterUpdate event, as

```
If IsNull(Me!Disassembly) Then
DoCmd.OpenForm "DisassemblyFormName"
End If
```
