Jim

Where are you getting the numbers from (i.e., what data/table structure are you using)?

On a form and report I am trying to make the one days ending balance appear as the following days beginning balance (e.g)

Day	Beginning Balance	Income	Expenses	Ending Balance
Mon	10	15	5	
20				
Tue	20	10	15	
15				
Wed	15	5	15	
5				
....				

I am using a crosstab query to calculate my income and expense column numbers and I can do the math on the form to get the ending balance, but I am not able to make my ending balance the next days beginning balance.

Thanks for your advice
