

Compare versions of a form found in two databases ?

Source: <http://www.tech-archive.net/Archive/Access/microsoft.public.access.forms/2007-03/msg00858.html>

I would like to compare forms found in a production environment mdb with the same forms in a development version of the mdb.

Are there any good tools for reporting differences between forms ? control names, positions, attributes, event handling implementations, etc...

Thanks,
Richard
