Just because the combo doesn't go lower than 8 doesn't mean that you can't type a smaller number in there. Of course, if you go too small, it'll likely be illegible to your users.

Hi,

I am using Access 2000 as front end and sql server as back end. Now, I am using the font size 8 Tahoma. However, is there any way I could make this font much smaller than this. I need to accommodate 18 fields in a form and

I

do not want users to scroll right to find the fields those are at very right.

Thanks in advance.
