Hi,

I am using Access 2000 as front end and sql server as back end. Now, I am using the font size 8 Tahoma. However, is there any way I could make this font much smaller than this. I need to accommodate 18 fields in a form and I do not want users to scroll right to find the fields those are at very right. Thanks in advance.

Sent using the Microsoft Entourage 2004 for Mac Test Drive.
