RG,

Office SP3 was applied on this system a while back. Thank you for providing a link to the HotFix. It was applied today, however, error 3027 still reoccurs.

Thanks,
CIS

Is there any chance the Office SP3 has been applied? If not then wait for SP4.

If it has then you will want to apply the HotFix that corrects many of the problems created by the SP.

Description of the Access 2003 post-Service Pack 3 hotfix package: December 18, 2007

Hello,

Could you please help me with Error 3027 in Access 2000 database? It was working fine until recently. Users attempt to update records and get VB message "Cannot update. Database or object is read-only." The database consists of two files front end and back end, user has full rights, Windows XP SP2, Access 2003 SP3. The error is generated at this line - rfqSet.Edit.
Thanks!

```
=====
Private Sub Button78_Click()
'On Error GoTo Button78_Click_err
Dim SQL$
```

Re: Run-time error 3027

```
Dim Criteria$
Dim RFQNUM As Long
Dim ZRPOSET As Recordset
Dim rfqSet As Recordset
Set ZRPOSET = dbAFH.OpenRecordset("Select * from
JoinZRPOZRPOItem where
ZRPONumber = " & txtRFQZRPONumber, DB_OPEN_DYNASET)
Set rfqSet = dbAFH.OpenRecordset("Select * from JoinRFQRFQItem where
RFQNumber = " & txtRFQRFQNumber, DB_OPEN_DYNASET)
```

```
'Find This RFQ
rfqSet.MoveFirst
```

```
'Find Matching ZRPO
ZRPOSET.MoveFirst
```

```
'Update Header Information
rfqSet.Edit
rfqSet("RFQCustomerNumber") = ZRPOSET("ZRPOCustomerNumber")
rfqSet("RFQComments") = ZRPOSET("ZRPOComments")
```

```
RFQNUM = rfqSet("RFQNumber")
```

```
rfqSet.Update
=====
```
