Hello

I have a subform that is continuous. There's a field that is memo and the Key behaviour has 'Enter new line'. The users will be entering anything up to 3 lines but mostly 1 or 2. I've got the height of the field to show 2 lines which is looking good, viewing 3 takes up too much space and is a waste a lot of the time. . but what I would like is that if there happens to be 3 lines entered (rather than have the field vertical scrollbar) I'd like the field height to grow to view all 3.

Is that possible?

Thank you
