>>-----Original Message-----

>>Hi there! Using A02 on XP. I have a message boxes that,  
if

>>required, is to pop up when the form opens. But my  
>>problem is that it actually appears BEFORE the form  
opens

>>and you can't see the form until you click Okay to the  
>>message box. I want the form to open and THEN the  
message

>>box to appear. I have tried OnOpen up through OnCurrent  
>>and the msg won't wait for the form to be open  
>underneath.

>>It is a reminder button that checks to see if a certain  
>>fields date is more than 30 days old and remind you to  
>>update specific data. If they could read the message as  
>>well as see the form, they could better identify what it  
>>is they are to do. If they click okay and then forget  
the

>>wordage, Uh-Oh. OnCurrent works for subsequent records  
>but

>>not the first one. I can't use any edit type procedures  
>as

>>they may only be looking at the form.

>>

>>Any help or advice would be very much appreciated.

Thanks

>>in advance for your time!

>>

Okay....so how.....???
