Hi all.

I do not really know which group to post that to

When I am in vba window and I type a control's name and set a '.' after it so far it always came up with some properties etc

I don't know what happened or what the reason could be but since a few days – sometimes – after a dot that dropdown is shown for a part of a second only and I cannot choose anything from it

(options – editor – checked all)

in addition, sometimes when I type eg a space after a second the space is taken away and I am at the end of last expression

oh no !!! I work on access 2k SP6 on w2k

please any help or idea as what to do is highly appreciated

Gina
