Please consider providing instructions in the Access Help facility on how to avoid entries in a Combo box from being sorted. The "not sorted" facility in the query section doesn't seem to work. All the Combo box entries appear in alphabetic order by default. I want the items in the Combo box to appear in the order I entered them ie Detached house, Semi-detached house, Bungalow, Flat etc but, despite the kind suggestions of two people in the News Groups I can't manage to achieve this (and yet it seems as though it should be simple).

.
