I am looping on an varying number of items and would like to assign a different variable to each. Possible to increment a variable and assign the unique variable on each loop? If so, how would I do it?

For example, I may have 5 items that I want to set as a myvar1, myvar2, ... myvar5 on one loop, but the next time I may have 15 items (myvar1 ... myvar15) the next time.

Any help is greatly appreciated. Thanks.

Gary
