- 

I have a button, that upon pushing is supposed to fill other fields in from the subform....

1. It worked at one point- and now it won't!
2. is there a better way to do this?

Forms!frm\_request!Casefreight =

Forms!frm\_request!Frm\_Request\_Items!sumcasefreight

When I break the code the Casefreight =0 and the sumcasefreight = 42.77.

What is going on?

.
