I would like to open an html file with a command button.

This code doesn't seem to work. Generates a "file not found message". The not found file is iexplore.exe.

```
Dim stAppName As String
```

```
stAppName = "iexplore.exe c:\db files\manual.htm"
```

```
Call Shell(stAppName, 1)
```

Any suggestions on opening this htm file with internet explorer?

Thanks,  
Bill
