Hi,

Yes I am using same databse please see below:
Private Sub Form_Open(Cancel As Integer)
MouseWheelOFF
End Sub

No still showing "Sub or Function not defined"

Amir

"Gina Whipp" wrote:

Is the module in your database?

Also Change code, just put this on the Form_Open:

```
Private Sub Form_Open()  
MouseWheelOFF  
End Sub
```

Hi,
Thanks for reply, No it's not working I try without (False) showing "
Variable not defined".

Re: MouseWheel

I download again just to make sure but still not working same error message.
I didn't find that Dll in Windows/System folder now I copy that but still same message.

Please advise what else should I check? Thanks for your time and help again
Amir

Have you tried it without the (False) ie just
blRet=MouseWheelOFF ?

Have you made sure you haven't got another version of
MouseHook.dll
possibly
in your Windows/System folder?

TonyT..

Hi,
i got info link
<http://www.lebans.com/mousewheelonoff.htm>

I am using below in Form Load event and
copy Dll file in same directory
but
it's not workign and showing "Sub or
Function not define" and focusing
on
MouseWheelOFF.
But when I use your sample data base it's
working I don't know what I
am
missing?

Please advise – thanks.

AMIR

Access97:

Re: MouseWheel

```
Private Sub Form_Load()  
Dim blRet As Boolean  
blRet = MouseWheelOFF(False)  
End Sub
```
