You have been so much help thus far, however, I am just not getting it right!
Would you be willing to type the code out for me?

"Ofer Cohen" wrote:

Try

Would someone please tell me what I am doing wrong?!?!?! I have tried the quotes and I am still getting a compile error. Both ID fields are text. My coding is below (at least my attempt at coding):

```
CurrentDb.Execute "DELETE FROM tblMovement " & _  
" WHERE EmpId = " & lstNewSupervisor.Column(0) & _  
" AND SupervisorID = " & txtSupervisorID & ""
```

**** In the last line you have double quote to much in the beggining, and missing an & in the end to include the last single quote, and I assume by your code that both fields SupervisorID and EmpId are text fields, if they not you'll get a type mismatch, in that case remove the single quote

RE: VBA Code Help

Greetings...

Would someone please tell me what I am doing wrong?!?!?!?

I have tried the

quotes and I am still getting a compile error. Both ID fields are text. My

coding is below (at least my attempt at coding):

```
CurrentDb.Execute "DELETE FROM tblMovement " & _  
"WHERE EmpId = " & lstNewSupervisor.Column(0) & _  
"" AND SupervisorID = " & txtSupervisorID ""
```

"Ofar Cohen" wrote:

Make sure that the txtSupervisorID and
lstNewSupervisor.Column(0) return value.

```
CurrentDb.Execute "DELETE FROM  
tblMovement " & _  
"WHERE EmpId = " &  
lstNewSupervisor.Column(0) & _  
"" AND SupervisorID = " & txtSupervisorID
```

If txtSupervisorID field will be blank you'll
get syntax error

Greetings...

I am getting a compile
syntax error with the code
listed below! Can someone
please help me with it? The
ID Fields are text fields.

```
CurrentDb.Execute  
"DELETE FROM  
tblMovement " & _  
"WHERE EmpId = " &  
lstNewSupervisor.Column(0)  
& _  
"" AND SupervisorID = " &  
txtSupervisorID
```

RE: VBA Code Help

Thanks!
