How can I get rid of extra blank spaces or cells in my columns? if I have a column with 26 numbers in it and the next column has letters "a b c d & f" in the column.

the data will display 1-26 correctly but the column with the letters will display a in cell 1, b in cell 2, c in cell 3, and d in 4, but will add a blank cell in and then display f in cell 6 . I have tried to sort etc. and cant lock the data. if I add an age column to say 65yrs old it really messes up all the other data. Can anyone help me?

Thanks Jeff!
