I missed the second part of your question – Searching on more than one key word at a time. Use the following for criteria if you want to find one OR the other keywords --

Like [Enter first keyword] &"*"

Then on the next criteria row use --

Like [Enter 2nd keyword] &"*"

If you want it to contain both of the keywords use --

Like [Enter first keyword] &"*" AND Like [Enter 2nd keyword] &"*"
