Mike:

One alternative is to use the MSComm control. The following articles may be a good reference, depending on your exact needs.

<http://msdn.microsoft.com/library/default.asp?url=/library/en-us/comm98/html/vbobjcomm.asp>

<http://support.microsoft.com/default.aspx?scid=kb;en-us;194922>

<http://support.microsoft.com/default.aspx?scid=kb;en-us;194923>

<http://msdn.microsoft.com/library/default.asp?url=/library/en-us/comm98/html/vbobjcommx.asp>

<http://msdn.microsoft.com/library/default.asp?url=/library/en-us/comm98/html/vbidxcommcontrolconstants.asp>

Once again I'd like to post this question.

Can anyone tell me if Access VB has the capability sending and receiving data via serial/comm port and if so where can I find some sample code that shows me how to accomplish this?

Thanks,

Mike
