ron you are right

Ron Weaver wrote:

Ok
Thanks

"Klatuu" wrote:

That is normal. The form does have to be open.
Look in VBA Help for the IsLoaded property. You can test for that before you do the requery.

"Ron Weaver" wrote:

Klatuu

It only works if the other form is open. I would like to have a choice of opening the other form. I get an error message when the other form is closed.

"Klatuu" wrote:

`Forms!NameOfOtherForm!List20.Requery`

"Ron Weaver" wrote:

The following code is in the After Update event in a listbox . It requeries a second listbox on the same form. How would that code read if that second

Re: After Update question

listbox was on a different
form?

Private Sub

List18_AfterUpdate()

Me.List20.Requery

End Sub
