If she is getting those messages, Macro Security is set too high. Form the main menu bar, Tools, Macro, Security.

Good morning,

I'm having a compatibility issue (I believe) between 2000 and 2003. I use the following sub to open a selected report form a listbox.

```
Private Sub lstReports_DblClick(Cancel As Integer)
On Error GoTo lstReports_DblClick_Error
```

```
'Open report based on user selection
Dim strRptName As String
strRptName = Me.lstReports
```

```
If Not IsNull(strRptName) Then
If strRptName = "Drawings Forecasted per Week" Then
DoCmd.OpenForm "Forecast Rpt Date Selection Frm", acNormal
ElseIf Left(strRptName, 5) = "DRM -" Then
DoCmd.OpenForm "DRM Report Form", acNormal
Else
DoCmd.OpenReport Me.lstReports, acViewPreview
End If
End If
```

```
On Error GoTo 0
Exit Sub
```

```
lstReports_DblClick_Error:
MsgBox "MS Access has generated the following error" & vbCrLf & vbCrLf & _
"Error Number: " & _
Err.Number & vbCrLf & "Error Source: Form_Report Selection Frm /
lstReports_DblClick" & vbCrLf & _
"Error Description: " & Err.Description, vbCritical, "An Error has
Occured!"
```

RE: Error 2501

Resume Next

End Sub

It works fine for any user running on access 2000. It also workd fine on my personal laptop running access 2003. However, a specific user running access 2003 keeps getting error 2501– The OpenReport action was cancelled. When she work on another computer with 2000 it works. This leads me to believe it is a 2003 thing?! But then why does it wok fine for me?

Another particular thing with her computer is the fact that she get prompted with 3 dialogs when she open the db. A security warning about blocking unsafe expressions, something a jet and then the standard message confirming opening this file... The first 2 dialog do not appear for anyone else... Is this a config issue with her pc? Does anyone know what might be the problem in this case?

Is "DoCmd.OpenReport Me.lstReports, acViewPreview" an acceptable command in both 2000 and 2003? or should I be using another command instead?

Thanking you in advance for your help,

Daniel
