Perhaps this is what you seek:\

DAO.DBEngine.120

In Access 2000 and 'Access 97 DBEngine, , I used to be able to late  
bind to the DAO library  
as follows

Dim dbe As Object

```
97'  
Set dbe = CreateObject("DAO.DBEngine.35")  
'2007
```

```
Set dbe = CreateObject("DAO.DBEngine.?????")  
Else  
'Access 2003-2003  
Set dbe = CreateObject("DAO.DBEngine.36")
```

Can anyone tell what the direct reference to the Access 12  
(ACEDAO.DLL) file will be (see the ????? above. If anyone kept the  
beta release newsgroups for Access 2007, I think I worked it out in  
about March 2006 but I have lost that newsgroup downloads.
