I am using vb-access for my application. In one report i am using between operator in SQL to fetch data from access database.

the following is the query:

```
SQL = "Select * from tbl1 where unit =1 " _  
      & " and utdt between #" & frmtdt & "#" _  
      & " and #" & todt & "#"
```

```
set sRs = dbCN.execute(sql)
```

if i am giving 31/12/2004 as from date and 1/1/2005 as to date working perfectly.

if i am giving 31/12/2004 and 2/1/2005 as a from and to date because of 2/1/2005 is a holiday the query fetching beyond the limit of "todate"

what is the solution ???
