Hi

In the following, "id\_Part" is a text field in a report.  
Me.txtPart is a field on my input form.  
strWhere is the condition for opening the report.

How do I concatenate the Me.txtPart so it is text (surrounded by single quotes)  
in the strWhere ?

In other words, I want the strWhere string to evaluate to the following:

id\_Part = '95405' (where 95405 is what is entered on the form)

```
Dim strReport As String 'Name of report to open.  
Dim strField As String 'Name of your date field.  
Dim strWhere As String 'Where condition for OpenReport.  
Const conDateFormat = "#mm\dd\yyyy\#"
```

```
strReport = "Sales History Inquiry3"  
strField = "is_Date"  
strField2 = "id_Part"
```

```
If IsNull(Me.txtStartDate) And IsNull(Me.txtEndDate) Then  
strWhere = strField2 & " = " & Me.txtPart  
End If
```

I hope I made this clear.  
Thanks in advance

Mark
