Actually, I think your problem is that you are trying to open an action query as a recordset. Unless this is actually a pass-thru query to SQL Server, I don't think you really need the terminal semi-colon.

Replace:

```
set objRS = objDB.OpenRecordset(strSQL1)
```

with:

```
objDB.execute strSQL1
```

then delete the RS.Close and RS = Nothing statements.

I am trying to run an Insert query and keep getting a "Run-time error '3137':
Missing semicolon (;) at end of SQL statement. I haven't seen this error before; however, I have a form event that triggers the following code to run
(I populate the variables and have other code too, but this is where the problem lies):

```
Dim strSQL1 As String  
Dim objDB As DAO.Database  
Dim objRS As DAO.Recordset
```

```
strSQL1 = "INSERT INTO StatusArchive([ID],[Priority],[Prev Activity],[Curr  
Activity],[Plan  
Activity],[Phase],[Percent],[BeginDate],[Code],[Rank],[SColor]) Values ("  
&  
PID & ", " + CStr(PrtY) + ", " + CStr(PrAct) + ", " + CStr(cAct) + ", "
```

Re: Missing semicolon error???

```
+  
CStr(PIAct) + "," + CStr(Phas) + "," + Pcent + "," +  
CStr(FridayOfWeek) +  
"," + CStr(Cd) + "," & Rnk & "," & sCol & ") Where [ID] = " & PID & ""
```

```
Set objDB = CurrentDb  
Set objRS = objDB.OpenRecordset(strSQL1) 'IT ERRORS HERE
```

```
Call objRS.Close  
Set objRS = Nothing  
Set objDB = Nothing
```

This is what I see in debug (everything is getting populated fine):
"INSERT INTO StatusArchive([ID],[Priority],[Prev Activity],[Curr
Activity],[Plan
Activity],[Phase],[Percent],[BeginDate],[Code],[Rank],[Scolor]) Values (
1,'High','Test Curr','Test Plan','Complete',1,'Friday, September 12,
2008','C',1,1) Where [ID] = 1"

Thanks in advance,
Al
