When I email the replica, the user is able to view the conflicts and resolve them. The problem is that I cannot view the conflicts when I open the Master or the replica on MY pc following the sync. I cannot figure out why the conflict window no longer pops up even tho it has worked since I created the DM about six months ago. (note: I always had conflicts to resolve every time I synced)

I am not familiar with Jet 4. Perhaps I should in a group for "beginners"? Thank you for your help.
