

How can 2 reports work and others fail?

I have a bunch of reports, and I am trying to change them to all use the same input forms. I got the form [Report Date Range]![Begin Date Record Time] working from my first 2 reports, then it fails in ALL the rest of the reports. These reports call in line SQL as follows:

/ AllBackups – first report WORKS */*

```
SELECT HistoryRecord.RecordTime, HistoryRecord.TCPIPAddress,  
HistoryRecord.Action, HistoryRecord.ActionType, HistoryRecord.ProfileName,  
HistoryRecord.TotalTime, HistoryRecord.CompletionCode, HistoryRecord.UserId  
FROM HistoryRecord  
WHERE (((HistoryRecord.RecordTime)>=[Forms]![Report Date Range]![Begin  
Record Date Time] And (HistoryRecord.RecordTime)<=[Forms]![Report Date  
Range]![End Record Date Time]) AND ((HistoryRecord.Action)="Backup") AND  
((InStr([HistoryRecord]![Action],"Backup")>"0"))  
ORDER BY HistoryRecord.RecordTime;
```

/ AllFailedFunctions – second report WORKS */*

```
SELECT HistoryRecord.TCPIPAddress, HistoryRecord.Action,  
HistoryRecord.ProfileName, HistoryRecord.TotalTime,  
HistoryRecord.CompletionCode, HistoryRecord.RecordTime  
FROM HistoryRecord  
WHERE (((HistoryRecord.CompletionCode)="Failed") AND  
((HistoryRecord.RecordTime)>=[Forms]![Report Date Range]![Begin Record Date  
Time] And (HistoryRecord.RecordTime)<=[Forms]![Report Date Range]![End Record  
Date Time]))  
ORDER BY HistoryRecord.RecordTime;
```

/ AllTapeStatus – third report FAILS*/*

```
SELECT HistoryRecord.RecordTime, HistoryRecord.RecordSource,  
HistoryRecord.Action, HistoryRecord.ActionType, HistoryRecord.TapePoolName,  
HistoryRecord.TapeVolSer, HistoryRecord.TapeSetName, HistoryRecord.UserId,  
HistoryRecord.TCPIPAddress  
FROM HistoryRecord  
WHERE (((HistoryRecord.RecordTime)>=[Forms]![Report Date Range]![Begin  
Record Date Time] And (HistoryRecord.RecordTime)<=[Forms]![Report Date  
Range]![End Record Date Time]) AND ((HistoryRecord.Action)="TapeStatus"))  
ORDER BY HistoryRecord.RecordTime;
```

Any ideas? Thanks, Rusty
