Try changing the background color? Not being able to drag left is usually caused by a vertical line which when positioned at the exact edge of the print area is difficult to see. Not being able to drag up is usually a horizontal line. Of course other controls can be inadvertently set to have zero height or zero width (or both) in which case they would be hard to find as well.

Check the list of objects in the upper left and select them one at a time until you find the culprit.
