Well at least you can get in. Since you can see the permissions for 'administrator', that suggests that you do have administrative permissions. Are you able to add you (as user) to the Admins Group?

Also which mdw files give you access?

Try this. Log in as you (as user); create a new mdb and see if you can import all objects from your mdb. If you can then you (as user) will now own all objects, however security will be removed from the mdb. If you can get this far post back.
