Hi again Heros,

I have reviewed the threads on RWOP queries, and that section in Microsoft Security FAQ – I have gathered enough information about it to know that I need a comprehensive understanding, an overview of RWOP.

Is it appropriate for me to ask on this Discussion Group for recommendations on books or any other publications on rwop queries? If not, please forgive.

If so –

Please do so.

I have created a rwop on a secure database but I don't know which is the cart and which is horse. If I knew more about rwop queries I would better understand the sequence i should follow.

Thanks for any assistance.  
CharlieHorse
