Hi Gregory,

If access to that area has been blocked, then someone in the IT department has blocked it for a very good reason. You will need to speak to the powers that be to gain access. I'm afraid we will not be able to assist with this matter.

In any event...

This particular newsgroup is devoted to security questions concerning the database program called "Access" which is part of the Office family of products. The forum name can be a little misleading.

I would suggest you re-post your question in a newsgroup devoted to MySpace so you may receive the best help possible. Do a Google search for MySpace newsgroups and maybe something will turn up.

Good luck,

Would anyone be able to help me.  
I need to find out how to enable myspace.  
This is my greatest concern at the moment.  
It is blocked on these premisses,  
and i need to find a way to enable that.  
I already went to internet options,  
but it does not work.

write back please. ASAP.  
sincerely,
