I am installing my XP runtime app package on new XP workstations, all current windows/microsoft updates and patches.

I install logged in as Administrator. Properly, the setup.exe puts a folder in Start, All Programs, MyAccessApp.

When I create a new user, the MyAccessApp folder does not appear in All Programs.

I have to manually move it from Documents and settings, ADMINISTRATOR, Start Menu, Programs, to Documents and Settings, ALL USERS, Start Menu.

Why is this the case? This is the only program I am installing on this workstation that is behaving this way. All other programs I have installed do not behave this way.

Thank you,  
Kathy
