Hi AccessVandal,

That is a good trick. It helps but I'm not sure I will do it for now for there are certain issues concerning clients that have Access 2000, 2002 or 2003.

Thanks for your time. I will keep your advice in mind for the future.

Hi,

If you're using XP, not sure about Vista. Go to Control Panel – Folder Options – File Types Tab In the Registered file types list box, select the file extension of 'MDB' and below, click the 'Change' button. Select the Application listed or click the 'Browse' button to search the Access version you to open by default.

Hi Douglas,

You can't. The default will always be the most recently used version of Access.

That's not what's happening with my system. It defaults to Access 2003 and I always use Access 2007.

Of course, I can change the shortcut path, but it a pain to have to do it every time I create a database or a shortcut. I thought there was some trick.

I guess not

Thanks anyway.

Hi,

On my computer, I have the two versions of Access, 2003 and 2007. I want

Re: Access 2003 and 2007

[quoted text clipped – 15 lines]

"C:\Program Files\Microsoft
Office\OFFICE11\MSACCESS.EXE"
"C:\Folder\Database.mdb"
