Hi Doyle,

SBS 2000 is based on Windows 2000 and, as such, did not come with a Remote Desktop client like Windows XP. You can download and install the Windows XP RDP client onto the SBS 2000 server. It will install in the "Communications" folder.

Remote Desktop Connection Software Download

<http://www.microsoft.com/windowsxp/downloads/tools/rdclientdl.msp>

Weird happenings in SBS 2000;

I just Installed SBS2000. Note: Remote Desktop Connection is not present in the Communications folder. What selection in setup disk1 will will reinstall it ? I could not locate the correct download at microsoft ??

Thanks,  
Doyle
