www.sophos.com is number 1 for me and for the Dutch Personal Computer Magazine. The came out as the best out of 30 AV-programs on virus scanning, detecting and disinfecting.

Only available for companies, but the people at work are allowed to install it at home too. When you buy a 3 year subscription, you only pay for 2 years, when you would buy a 5 year subscription, you only pay for 3 years.

Scanning on desktop and serverlevel, Soon to come anti spam for Exchange. Easy to install, maintain and update, even for remote workers.
