I am trying to "Limit" the hours some of my users are logged on, actually I want to be able to Log them Off at the End of the Day. I am using SBS 2003...I see on the users Profile where I can set the time they are allowed to Logon....but the problem is, How Do I make Sure they Log OFF at the Specified Time? If they Logout, they are unable to Log back in until tomorrow, but providing they do not Log Off, they can remain connected to the Network. Can someone tell me how to Force the Logoff at a Specific Time?

.
