He should start with this one

Windows 2000 Service Pack 4 Network Install for IT Professionals

Windows 2000 Service Pack 4 (SP4) is a recommended upgrade. Download Windows 2000 Service Pack 4 to obtain updates that can help improve security, application compatibility, operating system reliability, and Setup.

Hi everyone:

I don't know how to answer this question to a friend who has asked me to help him out, he is a minister at church and he has an SBS 2000 SP3 server with 7 users. He runs exchange and a small SQL database. He said that he never had applied patches, never had problems, (yes, I know, I'm was shocked too.) I told him to do it ASP and apply the the SP4 and the SP4 rollup. I remeber i did the SP\$ a long time ago I need to know wich specific version of SP4 he will need and what services he needs to shut down before installing the SP4 , here is a list of what I found on the microsoft website. a Could anyone please tell me which one is the correct one? Thanks for your help.

Microsoft SQL Server 2000 Service Pack 4

Download SQL Server 2000 Service Pack 4 (SP4), the latest and most comprehensive update to SQL Server 2000.

Windows 2000 Patch: Driver Installation Program Does Not Install Device Drivers

Re: Question about a situation with SBS 2000 and SP4

Some driver installation programs don't work on Windows 2000 (W2K) after you install either Critical Update QFE 814033 or W2K Server SP4. The installation does not succeed and you receive an incorrect error that no drivers are available for the device.
