Thanks for that.

That must have been how the install program set them up. It's not something we would dare touch.

The external NIC (10.0.0.6) should not have DHCP enabled. Create a static entry for 10.0.0.6. (You don't want the IP of either server NIC to inadvertently change, so use statically assigned IPs for both). I assume 10.0.0.2 is a router.

Hi  
all,

Re: SBS2003, Outlook 2003, POP3 from client PC

Current  
situation:

We  
have  
SBS  
2000  
with  
three  
clients.

On  
these  
clients

we

and  
we

can  
also

send  
and

receive  
mail

direct  
through  
POP3.

New  
situation

We  
have

just  
installed

a

new  
server
