Iggi,

do we have a forum to discuss architecture design? Currently i'm doing a redesign of our 2002 architecture and would have some expert thoughts on my future architecture.

There's no specific forum for biztalk architecture, so this one would likely do (it has the highest traffic, so you'll likely get a response somewhat easier). The BiztalkGurus forums over at <http://www.biztalkgurus.com/forums/> are also a good resource.
