Yes, my orchestration published successfully but the sample did not.

Erik wrote:

Hi Amit,

I gave it to find the reason. But I found out that it seems to be nothing in general because I'm able to publish my own orchestration as web service successfully.

Hope it's the same for you.

Erik

I received similar error when I published the sample "Expose WebService"... I could not figure out the reason, please do help me if you were able to fix this error and test the sample

Thanks,  
Amit.

Erik wrote:

Hi all,

I was trying to run the Sample "Expose WebService" on my BTS 2006 installation.

All workde fine until the last step of the publishing as web service. After

I clicked 'Create' the flollowing error message came up:

Failed to create project

"[http://localhost/ExposeWebService\\_Proxy](http://localhost/ExposeWebService_Proxy)."

Unable to create one or more BizTalk receive locations.

Create receive locations command failed:

Re: Error Publishing Orchestration as Web Service

FileName=D:\Programme\Microsoft BizTalk Server

2006\BTSTask.exe

Arguments=ImportBindings

-Source="c:\inetpub\wwwroot\ExposeWebService\_Proxy\temp\BindingInfo.xml"

-ApplicationName="BizTalk Application 1"

ExitCode=1

Can anyone help?

Thanks and Regards

Erik
