- 

Following in event log, "The adapter failed to transmit message going to send port "SQL\_StatusUpdate" with URL "SQL://mlisilctgdfosql/Aff\_STP\_T1". It will be retransmitted after the retry interval specified for this Send Port.

Details:"HRESULT="0x80004005" Description="Transaction (Process ID 162) was deadlocked on lock resources with another process and has been chosen as the deadlock victim. Rerun the transaction.""

Anyone, please help! Thanks in advance.
