Hi Partner,

Greetings From iSmart Panache Team!!!

We have a interesting project with our end client in "San Diego, CA".
If you have any consultant interested and available, please do reply
me back with updated word format resume along with the rate .

Location: San Diego, CA.

Job Status : 4 Months

Position Title: Software Engineer

Complete Description:

Note: This position should be matched by companies that develop applications software. Companies that have both applications and systems software engineers and do not break them out should match Software Development Engineer (5101-5106). Responsible for the analysis, design, programming, debugging and modification of local, network or internet-related computer programs for commercial or end user applications such as materials management, financial management, HRIS or desktop applications products. Writes code, completes programming and performs testing and debugging of applications using current programming language and technologies. Completes documentation and procedures for installation and maintenance. May interface with users to define system requirements and/or necessary modifications.
