Hi Paul,

I just got info on this from dev team. It seems like we filed a bug of the similar issue a few weeks ago, and a fix has been made for it, but the fix won't be available to public until R2.

I will update here if there is more information on it.

Thanks.

Sincerely,

WenJun Zhang

<http://msdn.microsoft.com/subscriptions/managednewsgroups/default.aspx#notifications>.

Note: The MSDN Managed Newsgroup support offering is for non-urgent issues where an initial response from the community or a Microsoft Support Engineer within 1 business day is acceptable. Please note that each follow up response may take approximately 2 business days as the support professional working with you may need further investigation to reach the most efficient resolution. The offering is not appropriate for situations that require urgent, real-time or phone-based interactions or complex project analysis and dump analysis issues. Issues of this nature are best handled working with a dedicated Microsoft Support Engineer by contacting Microsoft Customer Support Services (CSS) at:

<http://msdn.microsoft.com/subscriptions/support/default.aspx>.
