When I right click the DocumentID in the first Orch2\_, I have to ports related to bamendtoend example which are :

BAMEndToEnd\_SendPort & BAMEndToEnd\_receivePort

I tried both of them, when I try to demploy I get the following message box :

\*\*\*\*\*

Do you still want to apply the tracking profile?

Additional information

....> The ContinuationID Orch1\_ does not have a matching Continuation. The activity will not complete if there is no corresponding Continuation defined elsewhere (Microsoft.Biztalk.Bam.TrackingCompiler.TrackingProfile)

\*\*\*\*\*

Again, I would highly appreciate if either you can provide me a goood version of the btt file or indicate what should i PICKUP FOR the "SetPorts mapping".

Another question, is there a doc that details what/how this example do which might help me solve the issue

Thanks

Hi Salarm,

According to the error message, the problem is most likely with the "DocumentID" node on the LHS of the Tracking Profile Editor. Please right-click on the DocumentID and the select "set port mapping" menu, then specify the port in the dialog box that pops up.

For more information, fix and explanation of some common TPE errors, you can review the following blog:

<http://blogs.msdn.com/vtyagi/archive/2006/02/23/538265.aspx>

Thanks.
