What is wrong with using Braindump? I have only used MS Press books, Meyers books, and Transcenders to pass all the exams I have taken to get my MCSA. I see a lot of posts saying not to use Braindump and that it is cheating to use it. Is this true and/or does Microsoft consider it cheating? I don't want to pass any test(s) by cheating, but I am not against using a source that would/will prepare me to pass the exams as long as it isn't against any rules and/or policys. I just don't want to do something that might cause me to have my certs revoked and prevent me from getting any more certifications.

Thanks!
