Date: Mon, 7 Jun 2004 11:31:27 -0700

I am a systems and network administrator looking for a position in the Boulder, Denver, Longmont, and Ft. Collins areas. Will relocate self to be closer to office, if necessary. Travel only 0-25% please.

I specialize primarily in Linux administration, secondarily in Windows and Network administration. I also have a wide variety of programming experience, technician skills, consider myself a jack of all trades, and am a fast learner for anything I don't know. My main industry experience is regional ISPs and worldwide webhosting.

Text resume below will speak loads more in detail. HTML, Word, and PDF formats are available at:

<http://www.asteroid-b612.org/resume.html>

Thank you,

-Tony

Anthony J. Biacco
630 Beauprez Ave.
Lafayette, CO 80026
(303) 981-4955 / (303) 926-0699
admin@asteroid-b612.org

Objective

An opportunity to use my computer experience and knowledge in an environment where I can learn, extend my knowledge, and contribute to a company's increasing network and/or web capabilities. In a job I would like to administrate servers, set up servers, and also build, design, and troubleshoot networks. My goal is to get certified in a wider range of network and system technologies, while using those skills to their highest potential in my employment

Salary expectations

\$45,000–\$65,000 p/year, depending upon the job and duties.
Paid vacation.
All negotiable.

Skills

PCs

* Experience with x86, Pentium, AMD, and Multi–Processor PCs,

Workstations, and Servers

* Compaq, HP, Gateway, DEC, Dell, Micron, and clones. Some

Macintosh.

- * Installing hardware, software, diagnosing, and troubleshooting.
- * 9.5 years hands-on experience.

High-end computational workstations

- * Mostly SparcStations from very frequent use in college.
- * Sparc IPC's, LX's, and Sparc 10's.

Operating Systems

- * DOS 6.22, Windows 3.1
 - o 9 years of expert-level user/admin experience
- * Windows for Workgroups 3.11/Windows 95
 - o 5.5 years of expert-level user/admin experience
- * Windows 98
 - o 3.5 years of expert-level user/admin experience
- * Windows NT 4.0
 - o 4 years of intermediate-level user/admin experience
- * Windows 2000
 - o 2 years of intermediate-level user/admin experience
- * Windows XP
 - o 1 year of intermediate-level user/admin experience
- * Novell Netware v3.12, v4.10
 - o 1 year of intermediate-level user/admin experience
- * Unicos 6.0 (CRAY Unix)
 - o 3 months of intermediate-level user experience
- * FreeBSD, NetBSD
 - o 3 months of expert-level user/admin experience
- * SunOS 4.1.x, Solaris 2.x, Ultrix 4.x
 - o 3.5 years of intermediate-level user/admin experience
- * Linux
 - o 7 years of expert-level user/admin experience

General Software and Programming

- * MS Office (all versions), Wordperfect, Lotus 1-2-3
- * X-windows, cc:Mail, and other miscellaneous packages.
- * Telnet, SSH, Ftp clients, WWW clients (Lynx, Netscape, MSIE)
- * Email clients (mailx, Pine, Netscape messenger, Outlook, Eudora)
- * Frontpage 98/2000 server extensions installation under Apache and IIS.
- * Gopher, Archie, Newsreaders
- * All IM clients
- * Other miscellaneous networking software.

Programming

- * C
 - o 6 years fluency, specializing in utils and client/server communication.
- * HTML
 - o 6 years fluency to v3.
- * Web Scripting/CGI
 - o Perl, C : 4 years fluency
 - o VBScript, Jscript, WSH : 6 months intermediate fluency
 - o CS Javascript: 4 years intermediate fluency
- * SQL
 - o Integration from C, Perl, and ASP scripting to MySQL and MS-SQL dbs.
 - o Web->linux->Windows->MS-SQL through ODBC-ODBC bridges.
- * Perl
 - o 4 years intermediate fluency.
- * Shell
 - o 4 years intermediate fluency, System util creation.

Servers

- * Can install, run, and configure:
 - o FTP : wu-ftpd, Proftpd (expert-level in ISP environment, creation of real and virtual FTP servers)
 - o DNS : Bind 8.x/9.x (expert-level in ISP environment), MyDNS (expert-level in ISP environment), djbdns dnscache, Microsoft DNS (intermediate-level in internal environment)
 - o SMTP: Sendmail 8.x, IMail 7, Qmail, MS Exchange 2000, Postfix (high-intermediate level, spam and virus filtering, integration with SQL DBs)
 - o POP3: Qpopper, pop3d (expert-level, custom integration experience with SQL DBs)
 - o NNTP: INN (intermediate-level in ISP environment)
 - o WWW : NCSA, Apache 1.x/2.x, IIS 4.x/5.x, Netscape FastTrack.
 - Expert-level fluency configuring and installing Apache in ISP environment. SSL management under Apache and IIS.
- Creating virtual servers, performance tuning, installation streaming for mass # of domains. Installation of web report software.

Configuration of IIS

in ISP environment w/access to SQL DBs, and creation of virtual servers.

o SQL : MSSQL 6.5/7.x/2000, MySQL 3.x (intermediate MS-SQL, expert

MySQL level. Creation and designing of DBs for applications)

o LDAP: MS Active Directory (intermediate level)

o ADMIN: Telnet, SSH, Terminal Services, PCAnywhere, VNC, What's Up

Gold, Webmin, Plesk 2.x/5.x

o APP : Veritas BackupExec 8.x, Coldfusion 4.x/5.x

(intermediate-level on Windows/Linux), ChiliSoft ASP (Linux), Sun

JDK/SDK (Linux), Tomcat 4.x (Linux), Real Audio/Video Server for

static/live content (Windows/Linux)

o DISK: IDE, SCSI, Software Raid 0/1, Hardware Raid 0/1/5, External

RAID enclosures, DAT/DLT/LTO tape libraries

o MISC: RADIUS setup for dialup/ISDN/pop3

authentication, NFS, SAMBA

cross-platform drive sharing between Unix and NT,

ODBC-ODBC cross-platform DB sharing between Unix and NT.

Querying/modifying NT DBs from Linux clients via scripts and web pages.

Setup and management of Axis and Intel NetPort

Print servers.

Networking

* PROTOCOLS: TCP/IP (expert-level in private and ISP environments),

IPX/SPX on Novell (intermediate-level in private environment),

NetBios, DHCP

* ROUTING: RIP v1/v2 and BGP/OSPF (intermediate-level in ISP

environment)

* FIREWALLS: Cisco IOS access-lists, Netscreen (VPN), SonicWall,

unix ipfwadm/ipchains/iptables

* ANALYSIS: tcpdump and NAI Sniffer Pro usage for network

performance, traffic management, and security analysis.

* MONITORING: MRTG installation and configuration for graphing of

disk space, bandwidth usage, modem usage, system

load, memory
utilization.

What's Up Gold and SNMP configuration for use in
24/7 monitoring
system. Creation of Email->Pager server.

* TELCO: DS-1/T1, DS-3 Configuration for Backbones
(private,
internet), CT1 and ISDN PRI configuration for
customer analog and
high-speed access. PBX, Voice mail, and 66/110
telephone block
work.

* HARDWARE: High-intermediate level installing Cisco
1700/2501/36xx
routers, HP routers, Cisco IOS, router
configuration, CSU/DSUs,
10/100base-T hubs, Layer 2/3 Asante, Cisco, and HP
Procurve
switches,
Ascend Max 4004/4048 and 3com Total Control Dial-
up access servers

Honors

- * Who's who among high school students
- * Spanish Honors Society
