True, as soon as i turn 16, i'll be finding a part-time job somewhere. The "professional" computer guy at my school got fired, so the AP is wanting to take away one of my electives so that i can work more on the computers. i've got some experience working at local realtors, but that's only a few hours' worth. At my school, the district people were stupid enough to upgrade to a bunch of new computers, including new NOVELL servers. I HATE novell, and all they do is upgrade it.
